Angio imaging - with Fixation Set for Instrument Rail

An ergometer designed for medical professionals, facilitating effortless mounting on imaging, physiotherapy, and examination tables featuring a standard 25x10 mm instrument side rail.

Seamless integration across clinical settings

The Angio Imaging ergometer, equipped with a multifunctional fixation set, is designed for effortless mounting on imaging, physiotherapy, and examination tables featuring a standard 25×10 mm instrument side rail. This configuration ensures stability and adaptability, facilitating both arm and supine ergometry in various clinical environments.

Compact design with broad applicability

With its compact footprint, the Angio Imaging ergometer is ideal for settings where traditional cycle ergometry is impractical. Its design supports a wide range of ergometric studies, providing reliable performance without compromising space or functionality.

Key features at a glance

This ergometer offers a powerful combination of precision, flexibility, and ease of use, making it ideal for diverse clinical and research applications.

- Workload range: 7 – 1000 Watt
- Compatible with ECG & CPET
- User friendly display
- Various test modes
- Extreme low start up load

Why the Angio imaging - with Fixation Set for Instrument Rail

Reliable and reproducible stress tests

The experience of professionals who calibrate many ergometers showed that the Lode ergometers are the most reliable across the complete workload and rpm range and still within specifications even after many years of intensive use.

Multifunctional

The ergometer can be used in various ergometry settings, enabling a multifunctional deployment.

Various test modes

Besides the hyperbolic (rpm-independent) mode that is used most of the time, the standard control unit offers several other test modes, like the fixed torque mode and the linear mode.These modes can be used in both manual and terminal mode.

High standards

Lode is a socially and environmentally responsible company. All Lode products are RoHS/WEEE compliant and Lode is ISO 9001:2015, and ISO 13485:2016 certified. All medical products comply to MDD 93/42/EEC, incl. IEC 60601-1.
