The standard in Ergometry

CARDIO with HUR SmartTouch Arm Ergometer with adjustable wall fixation

A cutting-edge solution designed to revolutionize arm ergometry in medical and rehabilitation settings.

Optimized for inclusive rehabilitation

The CARDIO with HUR SmartTouch Arm Ergometer with Adjustable Wall Fixation is specifically designed to facilitate upper-body exercise for individuals with limited lower-body mobility, such as wheelchair users. Its wall-mounted design includes an electrically adjustable vertical rail offering a 70 cm range, ensuring optimal positioning for each user. This flexibility makes it an ideal solution for diverse rehabilitation settings.

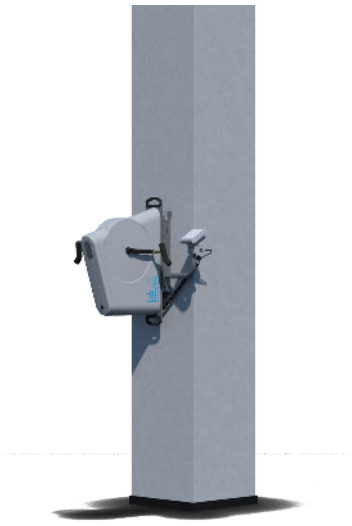
Seamless Integration with HUR SmartTouch

By integrating with the HUR SmartTouch system, this ergometer enables personalized training programs and real-time performance tracking. The 7-inch touchscreen display offers an intuitive interface for both patients and clinicians, enhancing the rehabilitation experience through user-friendly controls and comprehensive data management.

Multifunctional application

This ergometer is suitable for various settings, including cardiac rehabilitation, physiotherapy, and inclusive wellness programs, offering versatile application options.

- Electrically adjustable vertical rail
- Low start-up load (7 Watt)
- HUR SmartTouch compatibility



Why the CARDIO with HUR SmartTouch Arm Ergometer with adjustable wall fixation?

Easy to operate

For Lode products this means:

- Easy to connect
- Easy to move around
- Easy user interface
